

# Patrol CZ5001

Portable Appliance Testers  
Test & Tag To AS/NZS 3760

AEGIS

This portable appliance tester will perform the essential electrical safety tests required for portable appliances and equipment. It can be used to test domestic appliances, industrial appliances, power tools, powerboards and extension leads.

## The Aegis Patrol - CZ5001 consisting of:

### CZ5000

- Fully portable - mains or battery operated
- Continuous self monitoring
- Single press DC testing
- Drop proof / weather proof case (IP67)
- Leads & sample tags included

### CZ5500

- Leakage current measurement for 'Run testing' or 'Power up testing'
- Easy to use compact design
- Continuous measurement providing instant real time results
- Tests appliances which cannot be tested using a DC method

The CZ5000 and the CZ5500 can be purchased individually if required.
