

An Easier and Faster  
Way to Test n Tag and now  
featuring **20 Amp** operation!

If you need to Test n Tag, there is no other unit that comes close in price or quality. The heavy duty design and performance provides precision monitoring and readings, exceeding all the requirements and specifications outlined by the Australian AS/NZS 3760 standard.

**TnT+X** : Test n Tag Portable Appliance Tester at 20 Amp Operation

The **TnT+X** is a high-powered, Australian made, advanced safety tester that is ideal for general testing requirements at up to **20 Amp** load operation. The **TnT+X** offers high precision testing and speed plus connectivity with PC and PocketPC devices. The **TnT+X** is simple to use with one button testing that has a **PASS** or **FAIL** indicator, and it displays the **actual test readings**.

## Features

- Up to 20 Amp Load Operation
- KW & VA Measurement
- Load Current / Power Measurement
- Fully Portable & Scaleable System
- Resetable Overload Protection
- No Connection, No Test (NCNT)
- Appliance Leakage Current Test
- Insulation Test 250V / 500V DC
- Polarity & Continuity Test
- RCD Time Trip
- RCD Ramp Current Test
- Connects to PC & PocketPC
