If you need to Test 'n' Tag, there is no other unit that comes close in price or quality as well as adhering to the specifications outlined by the AS/NZS 3760 standard.

The TNT-el Portable Appliance Tester is a low cost, Australian made, advanced safety tester that is ideal for all general testing requirements.

This unit tests sensitive electronic equipment that cannot be tested using a standard insulation tester. The TNT-el is simple to use with one button testing, and has a PASS/FAIL indicator. The unit also displays the actual test readings.
